<b>CANDIDATE STATEMENT</b>	European policy of Open Access to scientific research is now one of the key issues discussed in public debates on the future development of scientific communication. Open Access helps giving equal access to knowledge and stimulates innovation and as such it has an important role in creating modern information society and economic growth. I am currently a member of Research Data Alliance and CESAER Task Force Open Science. My dissertation addressed the question of Open Access to scientific resources in the information activities of libraries. I would like to support LIBER's libraries in shaping and implementing OA policies and help LIBER develop strategies in this area.
