- Conclusion

History

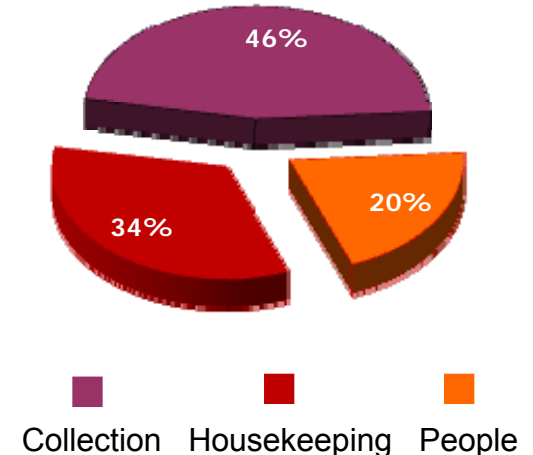

210 mm

- **1718** – Former military engineer **Willenberg** gets Imperial accreditation to teach „Ingenieurkunst“ and gets **300 florins** to buy books, models and instruments
- **1831** – The founder of Royal Czech Estates School F. J. Gerstner charges later professor of fermentation chemistry and rector of the Polytechnic **K. J. N. Balling** with the concentration of books to an indexed, subject arranged collection – advent of the library
- **1869** – after the split of the school to the Czech and German ones, the Library remains a common one, financed from the Country budget
- **1935** – an up-to-date library is built for the Library of Technical Universities (Czech and German) in the eastern wing of Clementinum
- **1960** – Library separated from Technical Universities
- **1991** – back under aegis of Ministry of Education
- **2009** – back to Technical Universities to the Dejvice campus

The past in Clementinum - 2008

210 mm

- financed by the Ministry of Education
- 2/3 of clients students of the CTU, ICT and other technical schools
- reading room, reference centre, computer study
- books, textbooks, standards, Czech law, ~1,2 mil. volumes + e-books
- subscription 1700 printed + 4000 e-journals
- opening hours Mon-Sat, 67 hrs/week
- projects:
 - e-resources for R&D
 - TECH portal
 - Virtual Polytechnic Library
 - National repository of GL
- budget 5.3 M € (2008)
 - out of it 2.2 M € collection development

History of the project

210 mm

- 1963 Maniny
- 1974 head of Nusle bridge
- 1992 Rohanský isle
- 1995 Dejvice – Vítězné square
- 1999 heart of the Dejvice
campus – Technická street

Vision of the new library

- transparent, permeable, understandable, flexible
- open, friendly, affable, inviting
- low energy and low operating costs house
- moderate use of hi-tech
- interior design – part of the overall building design
- architects: materialised textbook of contemporary architecture, civil engineering and technology

Project goals

210 mm

- Modern central common library serving universities, R&D and public in the technology and applied science area
 - national information infrastructure node for technology and related disciplines (e-resources licensing, national repository of grey literature, digitisation, EDD, ISSN centre, ...)
 - R&D laboratory of network technologies for library and information services
 - transform the library back to universities
 - release space in Clementinum for the National Library

Project dates

2000/07 – Gov't Resolution - Project NTL approved

2001/01 – Architectural contest - Projektil

2001/07 – Memorandum of Agreement ČVUT-STK-VŠCHT

2004/02 – Gov't Resolution - budget

2004/10 – project design started

2006/06 – permits acquired, contractor tender

2006/10 – the first dig

2008/12 – take-over

09/09/09 – opening of NTK to public

Library spaces, volumes

210 mm

- 1 322 study seats, mostly w/ network access + WiFi ubiquitous
- 562 relaxation seats
 - 29 individual study rooms (of it 2 for physically disabled and 2 multimedia study rooms suitable for visually impaired)
- 18 group study rooms for 8-10 people
- 4 computer study rooms (1*30, 3*50 seats)
- 1 night / complementary reading room
- 1 journals reading room, >2000 journals + 15000 e-journals
- 34 OPAC terminals + user PCs throughout the building
- >350 000 volumes in open stacks arranged by LCC
 - + ~ 150 e-textbooks
 - + 1.2 million volumes capacity in closed stacks underground

Other functions

- 
- social functions for the campus in the ground-floor:
 - conference hall 230 seats
 - exhibition hall 370+410 m² (90+50 seats)
 - café/restaurant 150 seats
 - municipal library branch Praha 6 (32 seats, 25 000 vol's)
 - university bookstore; IT store & accessories
 - training centre with 30 seats in variable setup
 - drink and snack machines on each storey
 - baby changing boards
 - + first-aid room in the basement
 - 300 parking places, 200 bike stands
 - 900 000 clients/year

Building

- 11 740 m² building plot area, out of it
- 5 000 m² built-up area
- 172 258 m³ total building volume, out of it
 - 118 411 m³ above ground
 - 53 847 m³ under ground
- 38 661 m² useful area of all storeys
 - 9 storeys, of it 6 above ground, 3 under ground
 - 6 elevators and 5 staircases throughout the whole building
- 2 352 MWh expected annual energy consumption, out of it
 - 1 258 MWh heating
 - 1 094 MWh cooling

Construction

210 mm

49 380 m ³	of earth excavated
55 711 t	weight of load-bearing structure, of it
102 t	steel structures
38 t	steel roof of the atrium
51 628 t	concrete without armature
400 t	tendons
25 m ³	pre-stressing channels
600 t	pre-fabricated stair wings
5 399 m ²	outer shell – glass form-pieces
6 320 m ²	outer shell – sheet glass

Costs

210 mm	
Overall project cost	85.17 mil EUR
<i>out of it</i>	
building – carcass	43.35 mil EUR
technologies except IT	19.83 mil EUR
IT	4.70 mil EUR
interior – mobiliary	4.65 mil EUR
project management	2.66 mil EUR
project documentation	2.80 mil EUR
engineering supervision	0.49 mil EUR
financial services	6.69 mil EUR

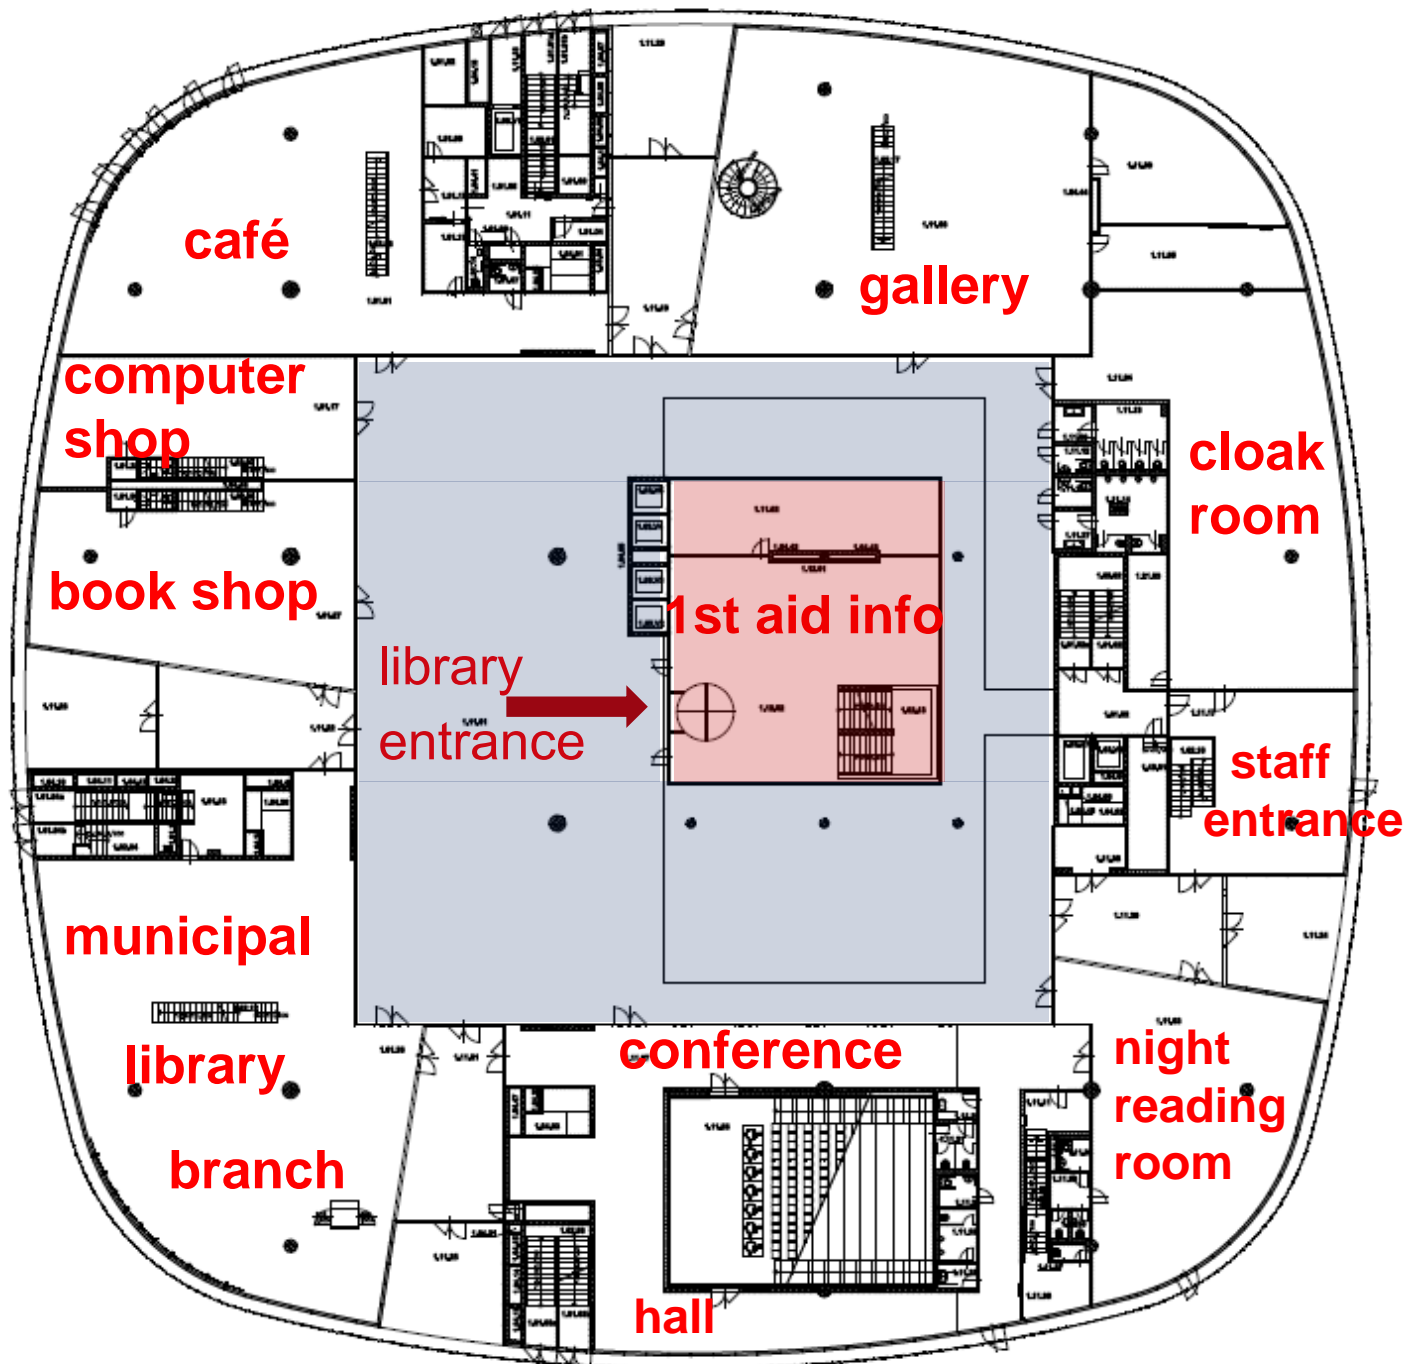

„Guinness book“ figures

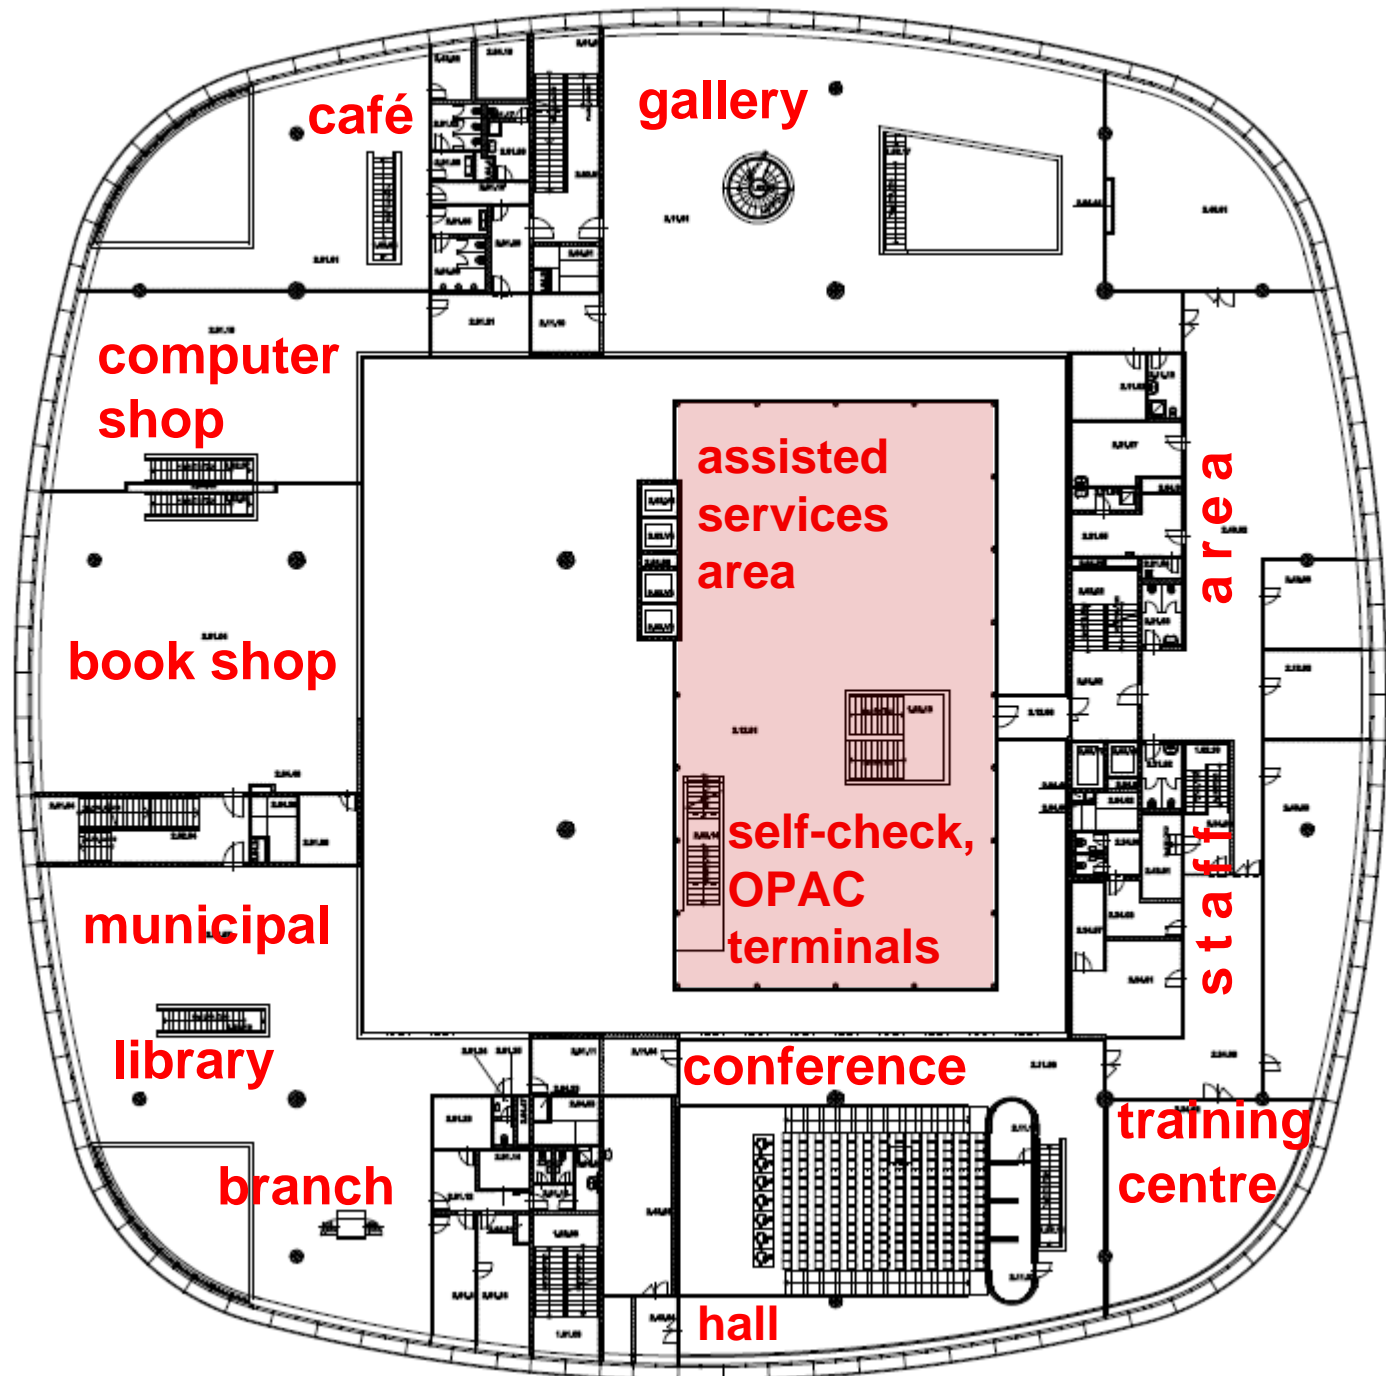

210 mm

190 km	light-current cabling
1,100,000	cable clips
256	acoustic motion detectors
117	cameras
46 km	heating/cooling piping in floor slabs
3 600 m ²	floor heating in ground floor
21 670 m ²	rubber flooring
4 125 m ²	bituterazzo in the ground floor
2 600 m ²	sound absorbing lining
20 km	pipes of high pressure extinguishing system
4 110	nozzles of high pressure extinguishing system
1346	automated combustion gas detectors
410 m	automatic smoke & heat screens

public area

- covered square
- exhibition hall
- conference hall
- night reading room
- public library branch
- book and computer accessories shops
- café

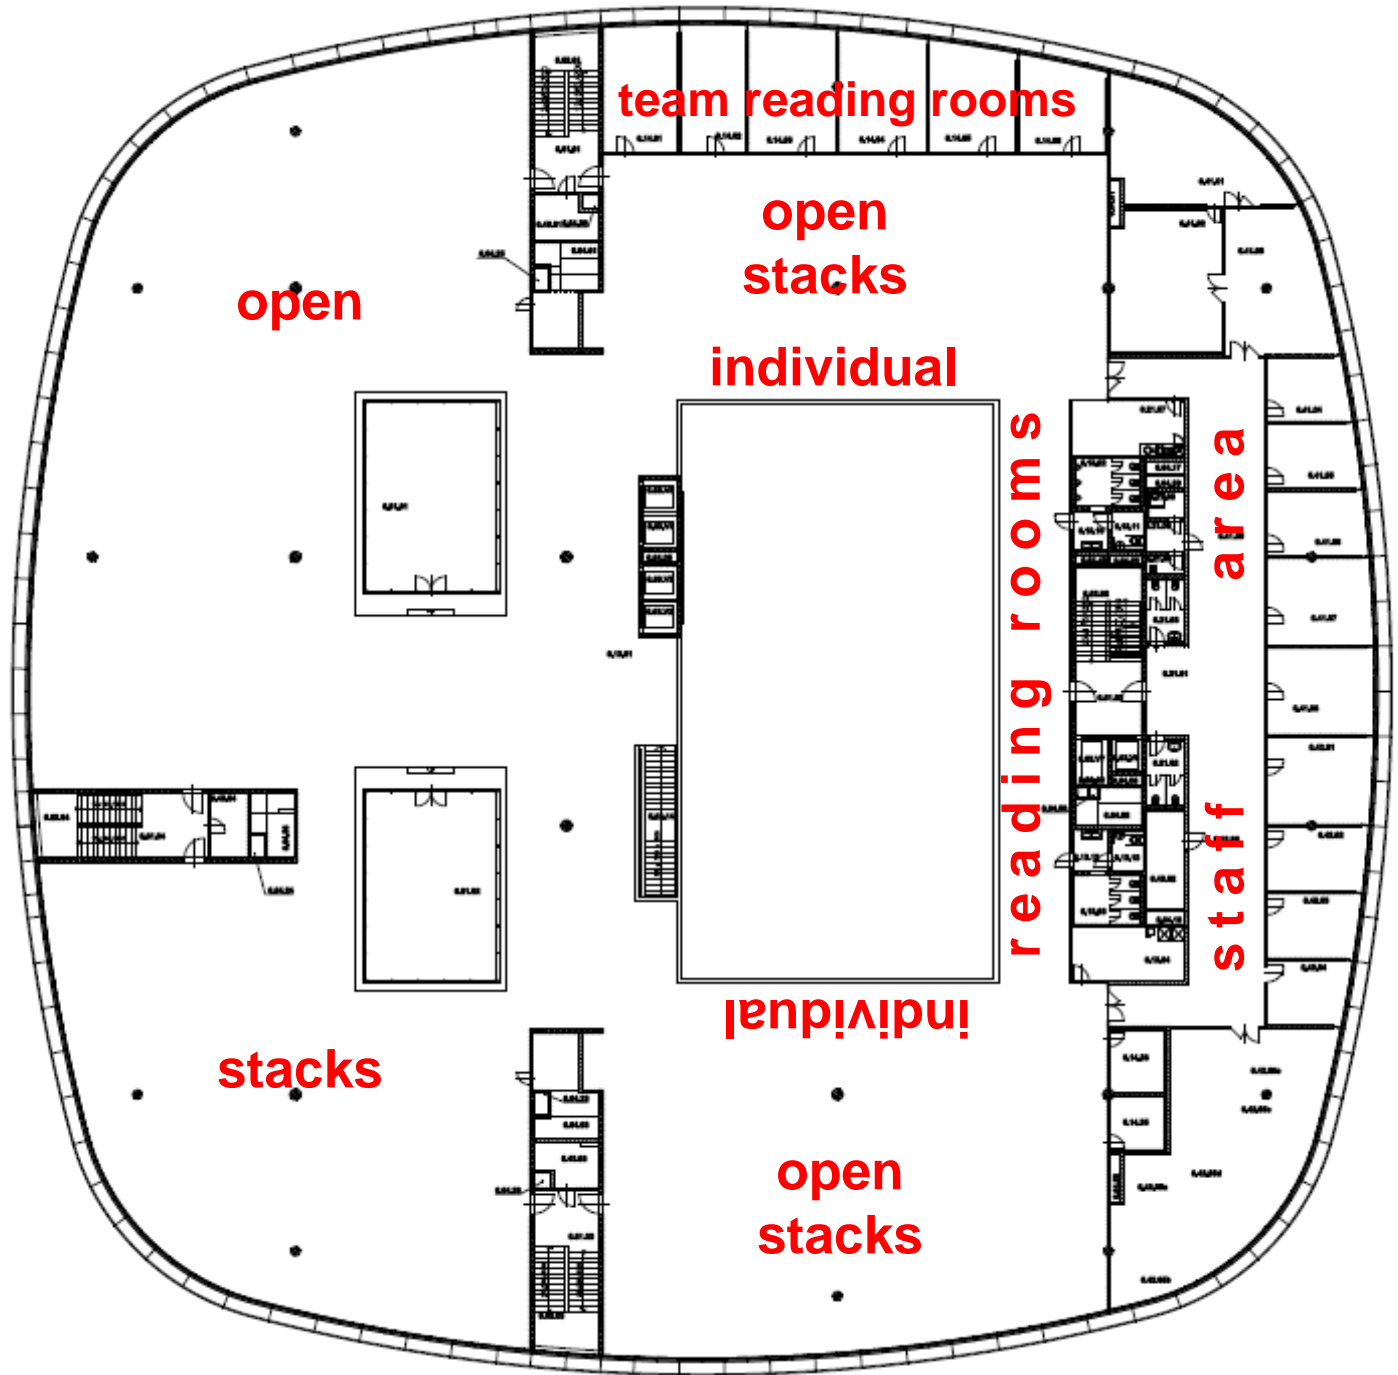

Lessons learned

- **P**lot – fundamental, otherwise risky business
- **P**ecunia – not just the volume, the certainty is what counts
- **P**artnership – in-house, governing body, architects, designers, contractor, ...
- **P**erspective – design for the [unknown] future
- **P**hlexibility – both in project and in decisions

People

210 mm

Everything told above, that is the idea, the design and a construction of the new building, in parallel with the working “old library” shaping up for the reincarnation in the new environment; this all starting with authors of the initial idea, through archeologists, architects, artists, assemblymen, building team, businessmen, designers, developers, draughtsman, economists, gate-keepers, IT people, lawyers, librarians, managers, organisers, suppliers, quantity & quality surveyors, trustees, etc. is a result of a collaboration of dozens of people.

I would like to thank all who endeavoured to accomplish this Gesamtkunstwerk.

In stead of a conclusion

We are social creatures and we need to be considered members of a broader group; that gives us power and strengthens our feeling of gregariousness. A society built exclusively on virtual on-line communities cannot end up but virtualized and dissubstantiated. Libraries – beside other institutions – correspond to our inner human need of community in the foggy expanses of cyberspace.

Lukez, Paul. Whither://multi-media.(cyber).libraries? In: Library Builders. London : A.D. Academy Editions, 1997.

A photograph of a modern building entrance with a glass facade. A large tree trunk is in the foreground on the left. The entrance has a set of concrete steps leading up to a glass door. The text "NTK 2" is displayed in large white letters on the glass facade above the entrance. The building's facade is made of vertical glass panels. The entrance area is paved with light-colored tiles. The ground in front of the steps is paved with dark grey tiles. The sky is not visible, but the scene is brightly lit, suggesting daytime.
