<p>CANDIDATE STATEMENT</p>	<p>Responsible and efficient research relies on both the openness and sustainability of modes of scholarly communication across the disciplines of science. Openness is king to Open Science as well as to responsible conduct. True Open Science requires not only Open Access to scholarly publications, but openness in all scholarly transactions permitted by law and disciplines' methodologies. This includes FAIR open data, transparency in RDM, data management plans, as well as in peer reviewing and to the validation of scholarly publications and data. For libraries to provide just the right service for science to accomplish that, we must further a common agenda, methods and extensive collaboration: I wish to help LIBER support science.</p>
