Changing Needs, Changing Libraries LIBER Architecture Group Seminar, 22 – 24 March 2006

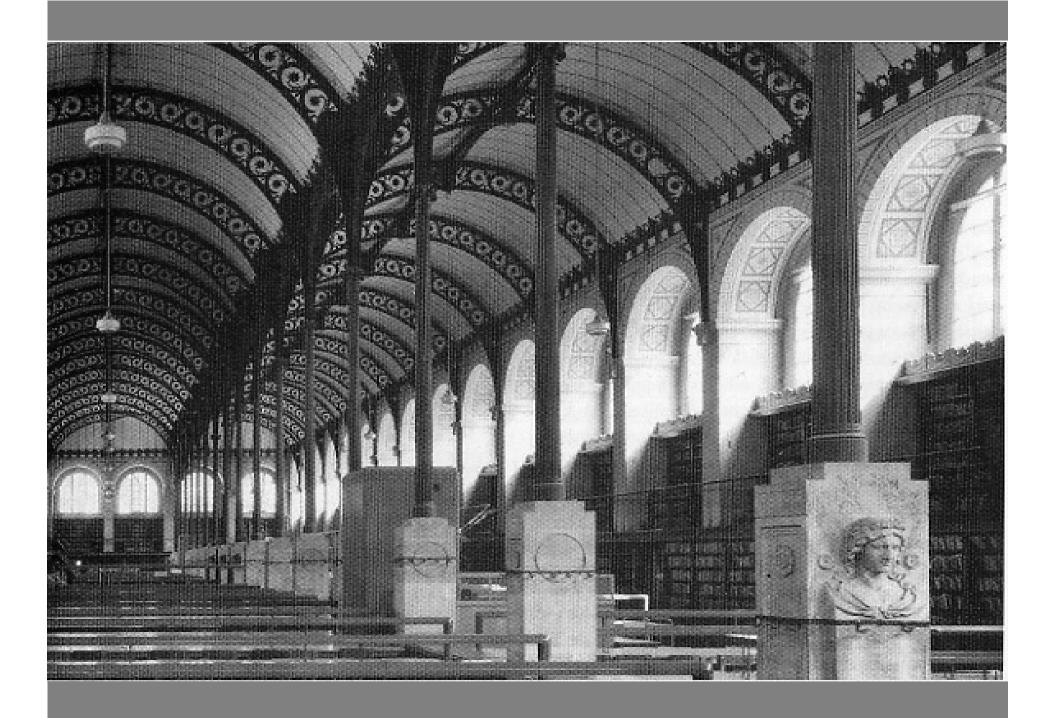

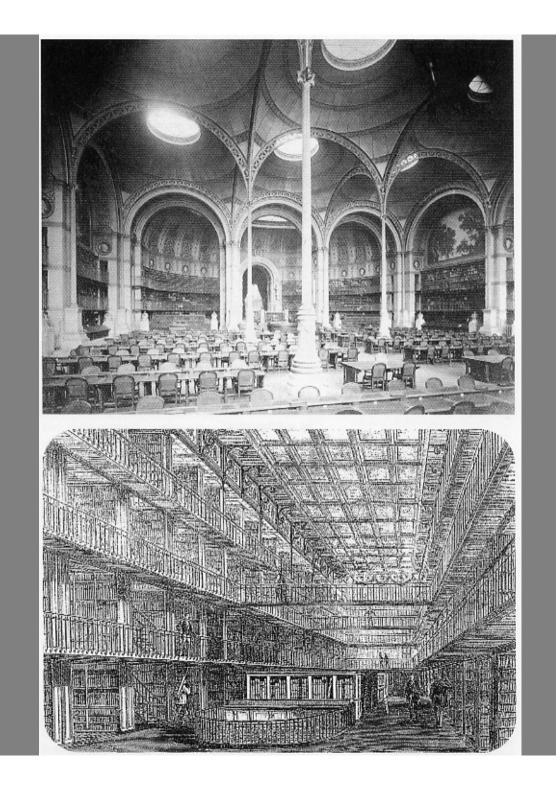

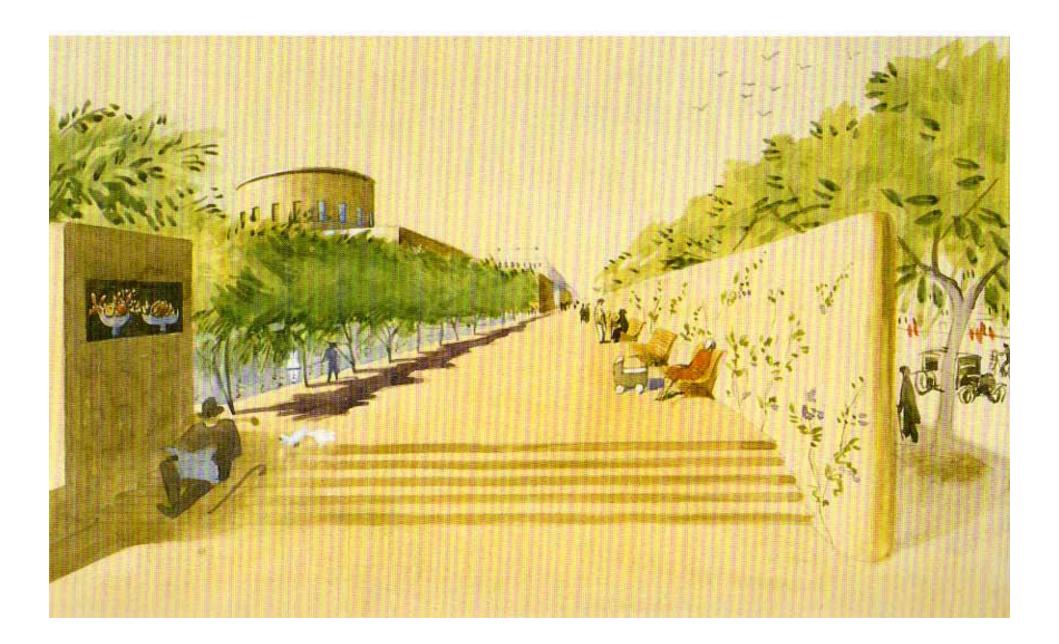

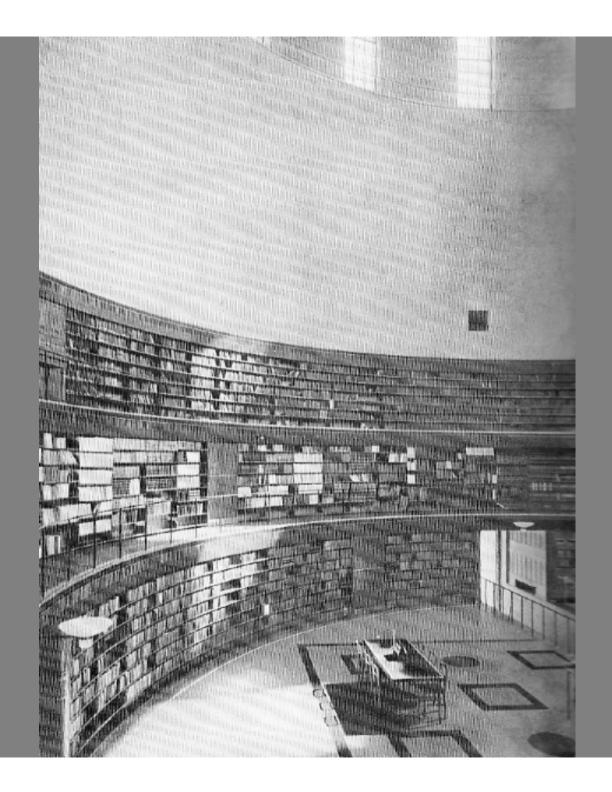

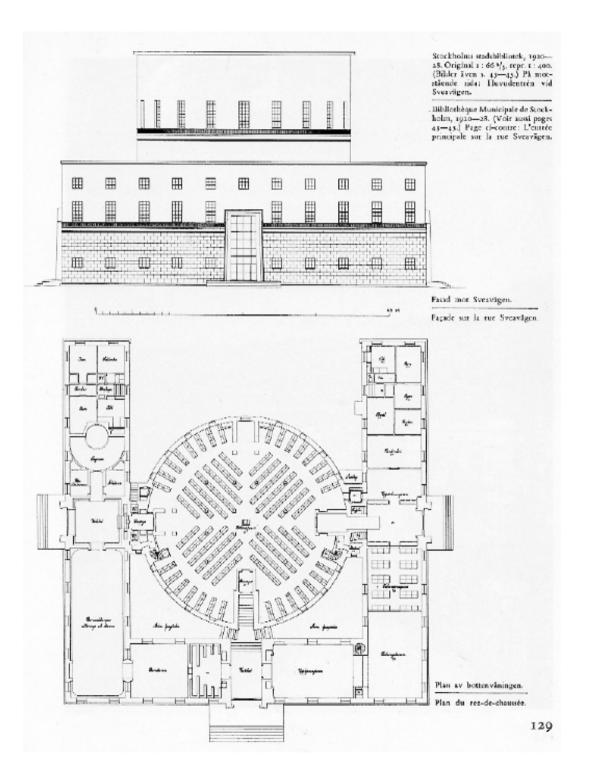

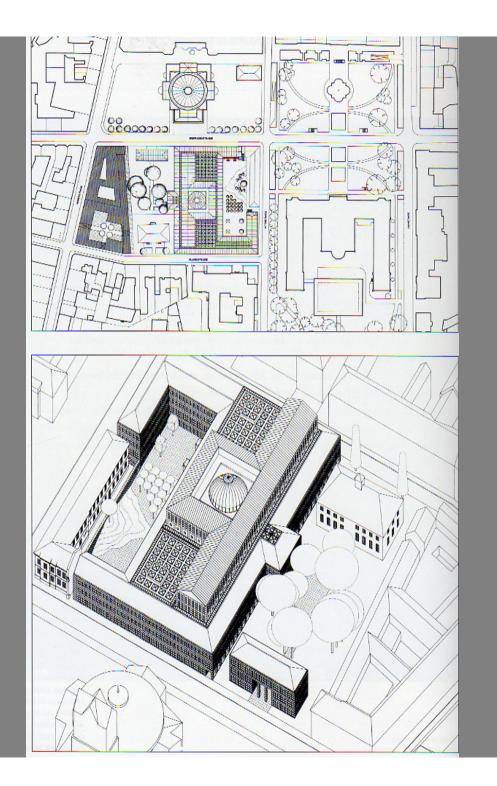

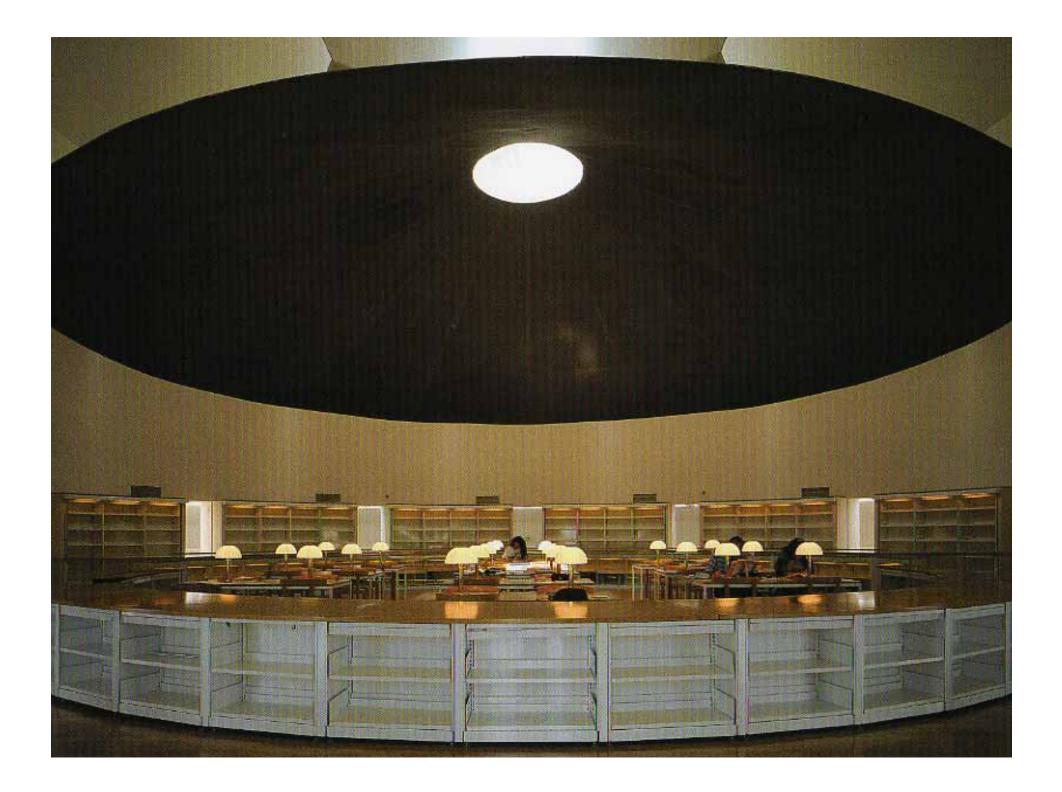

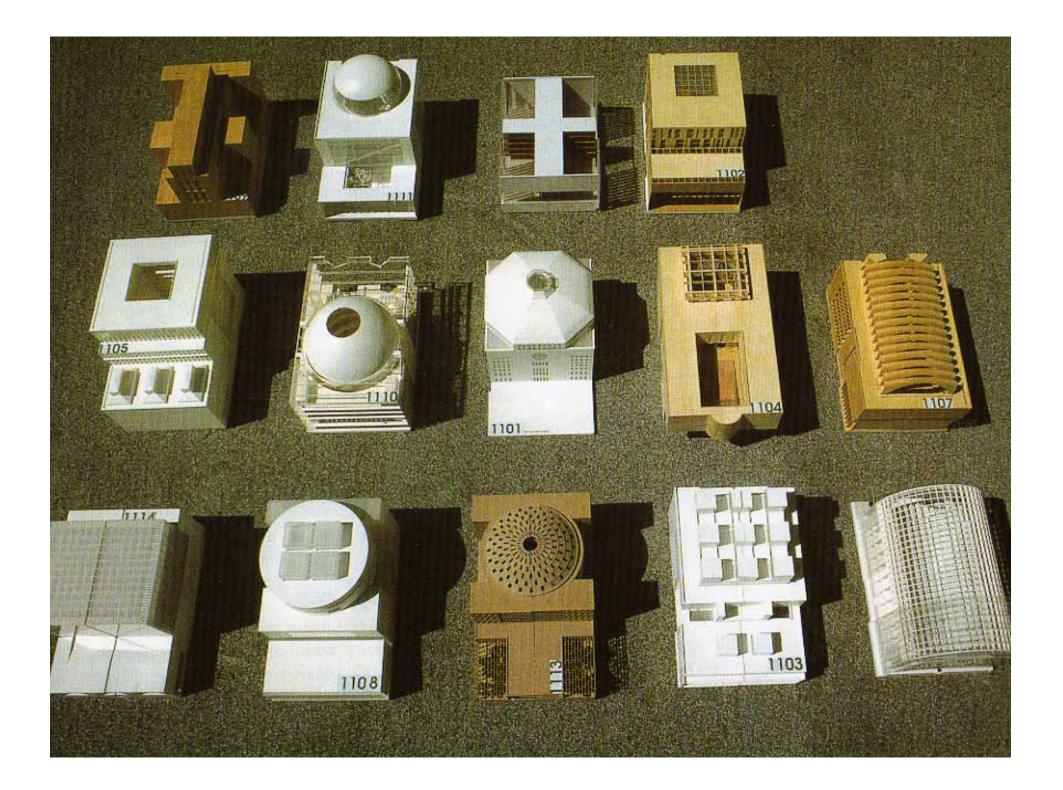

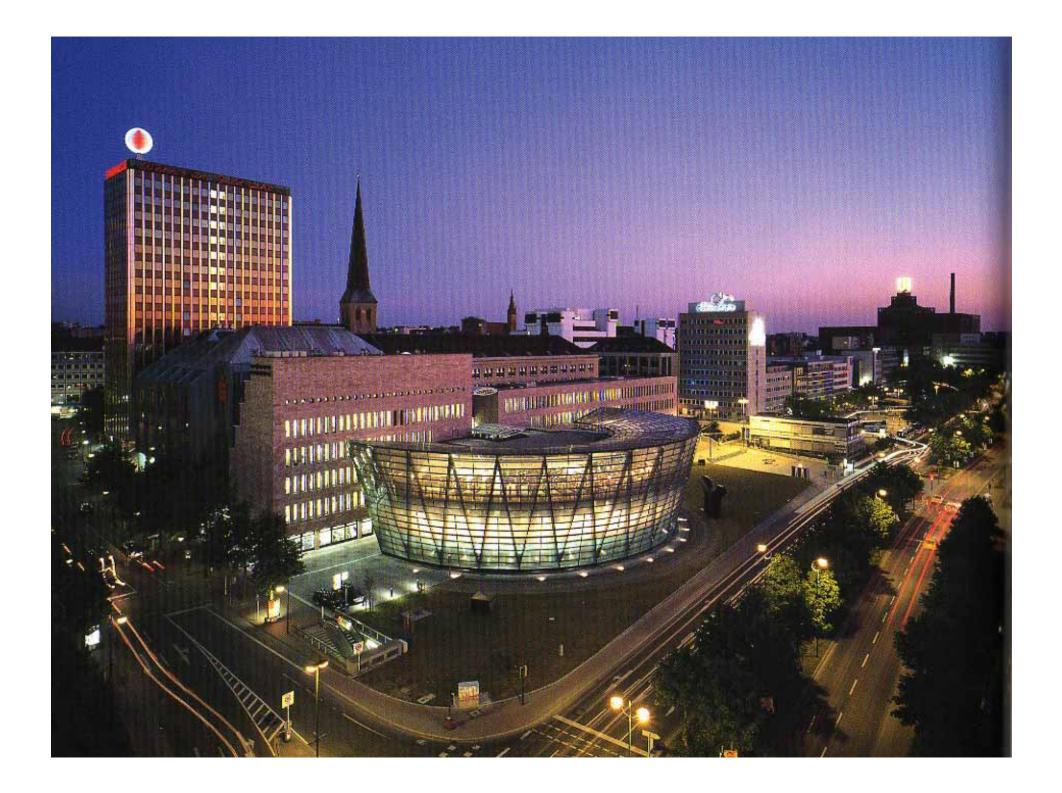

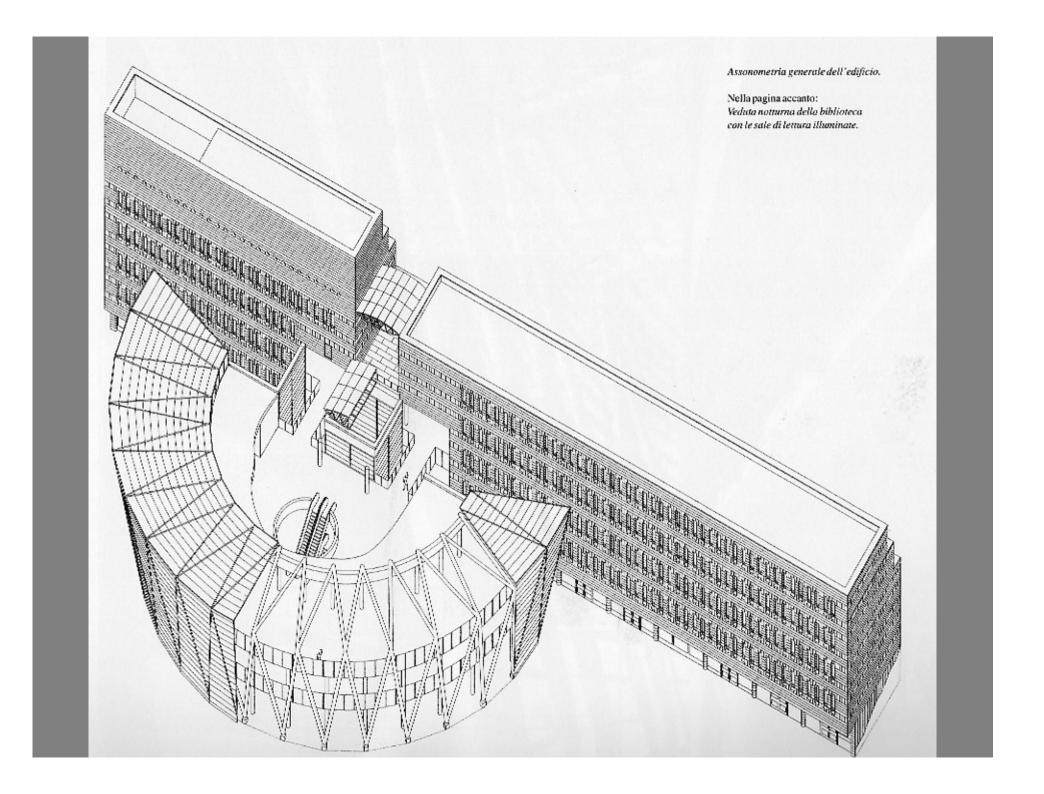

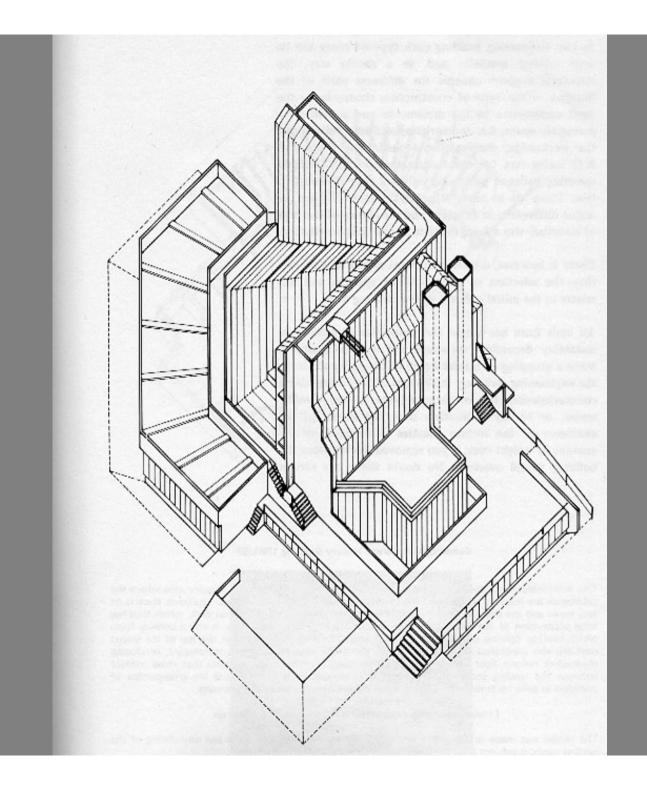

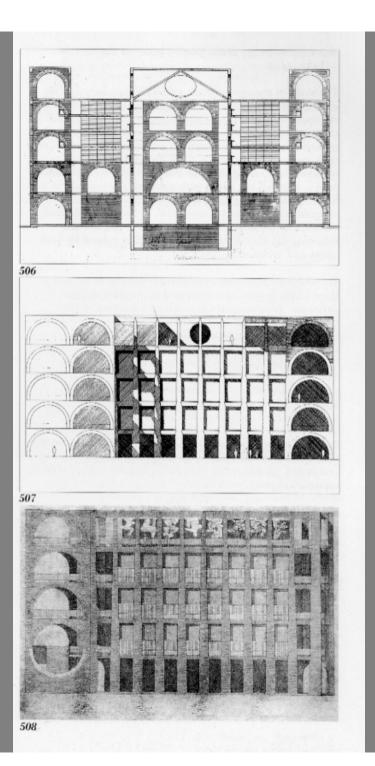

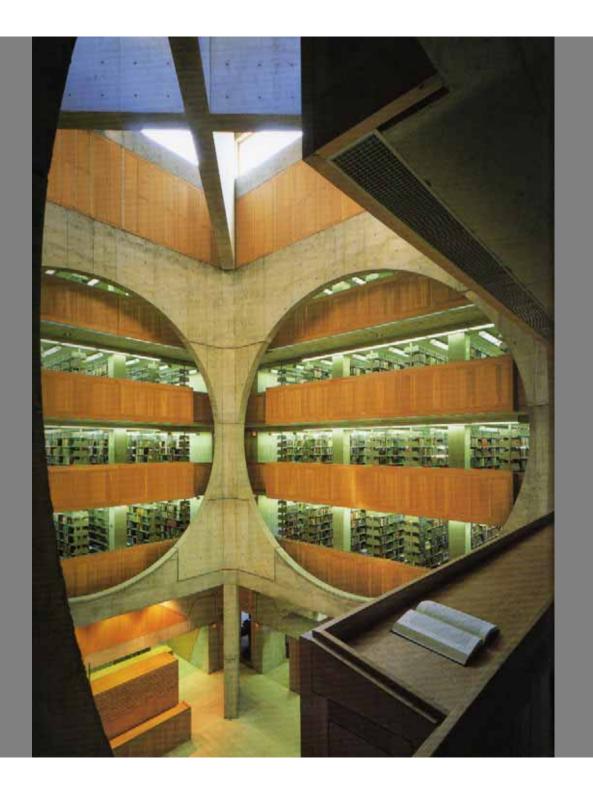

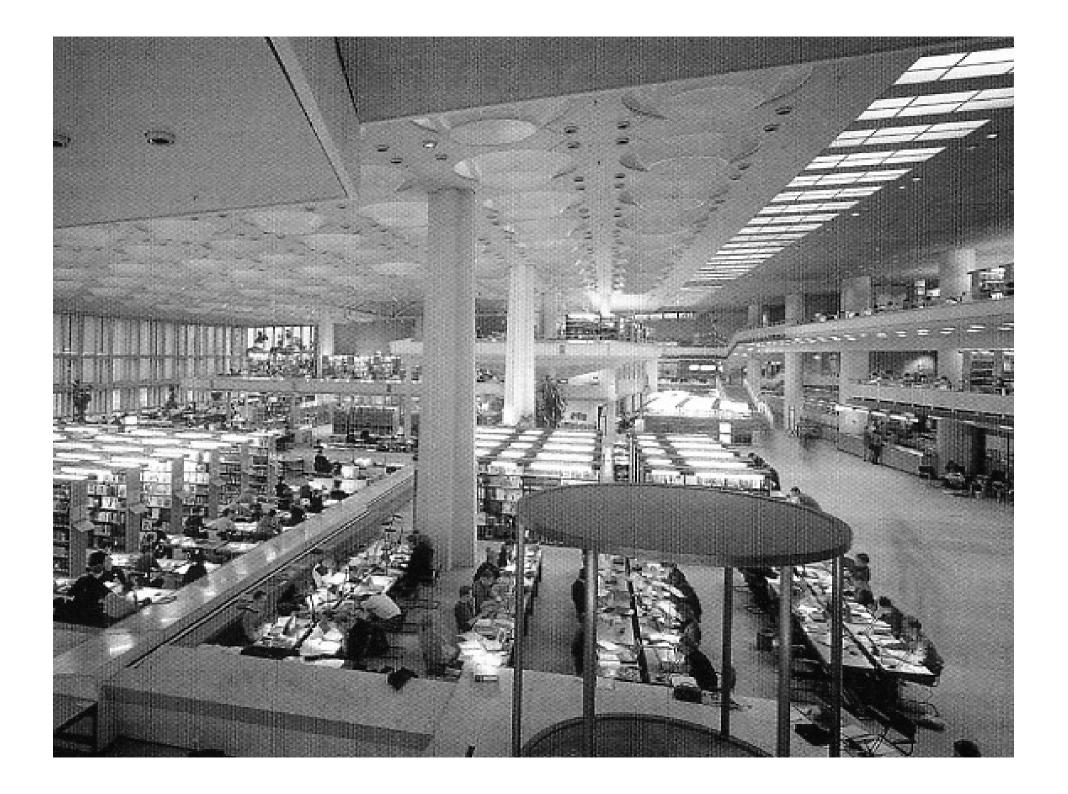

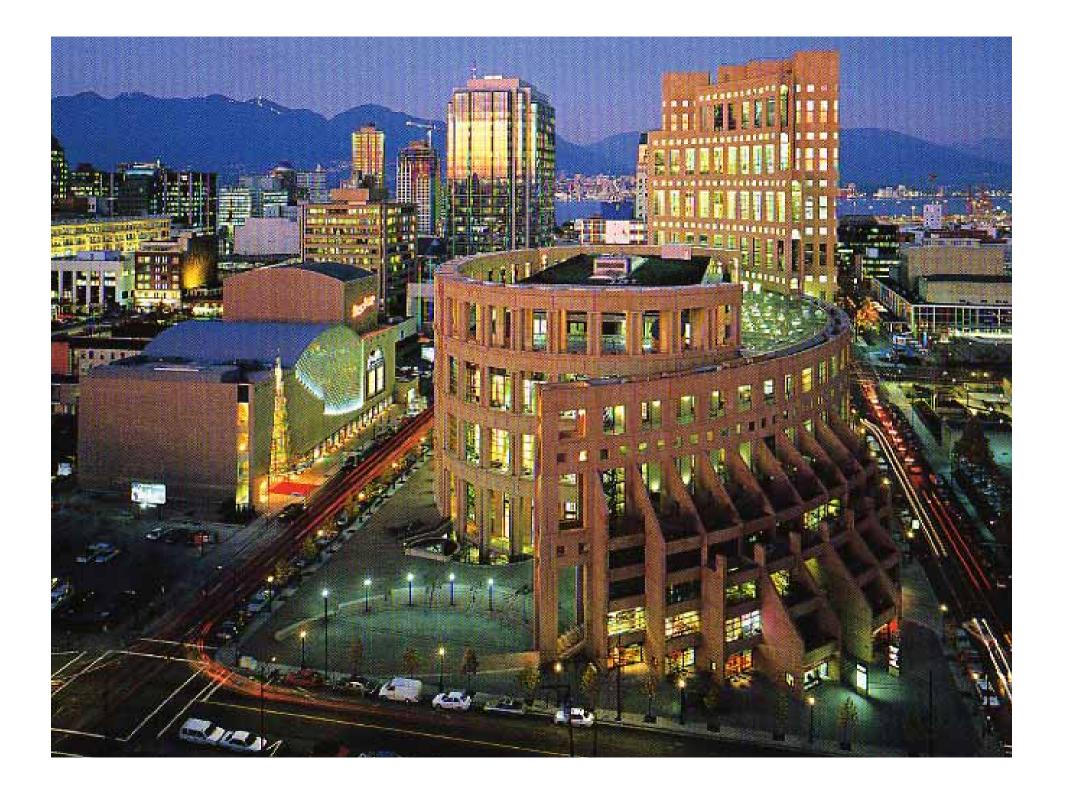

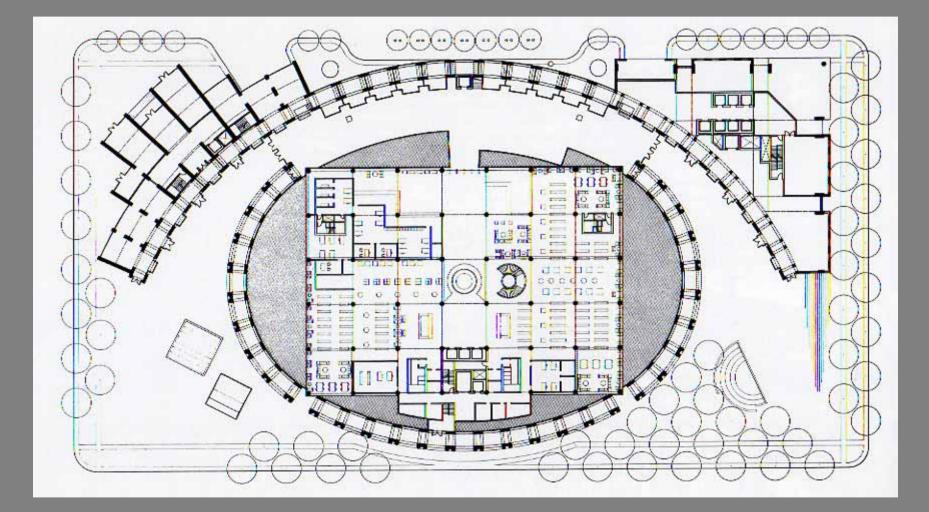

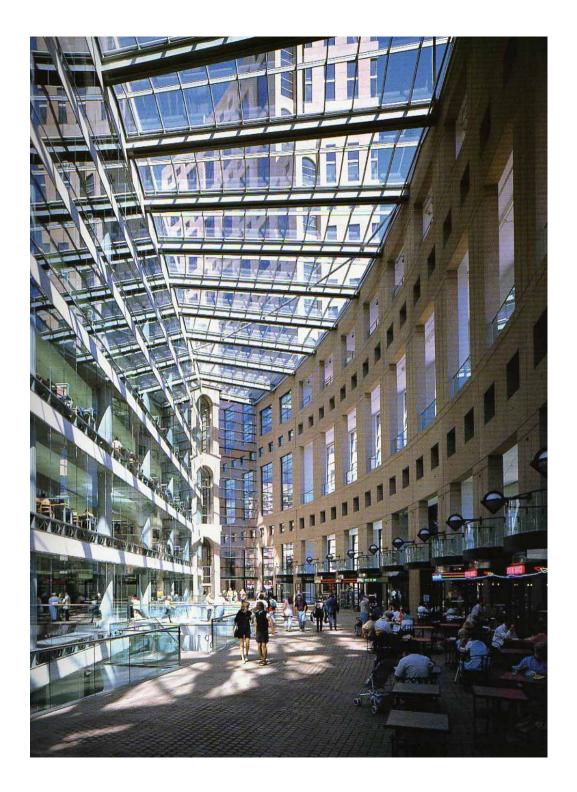

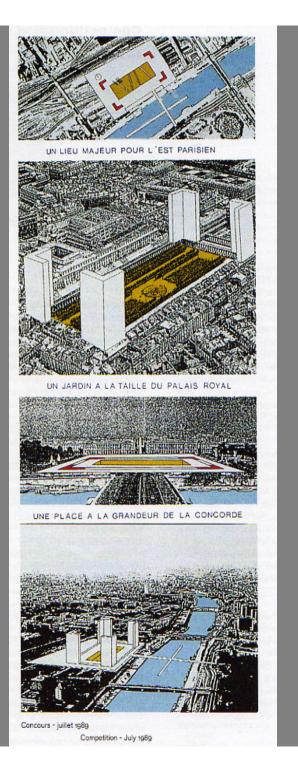

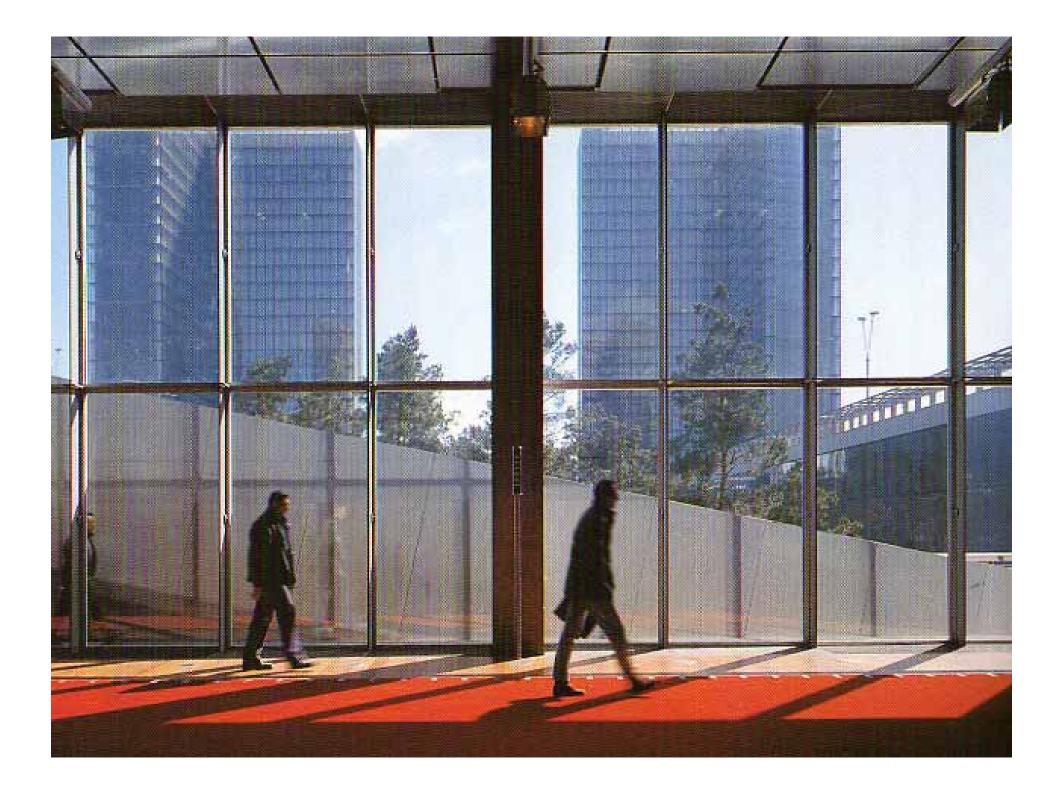

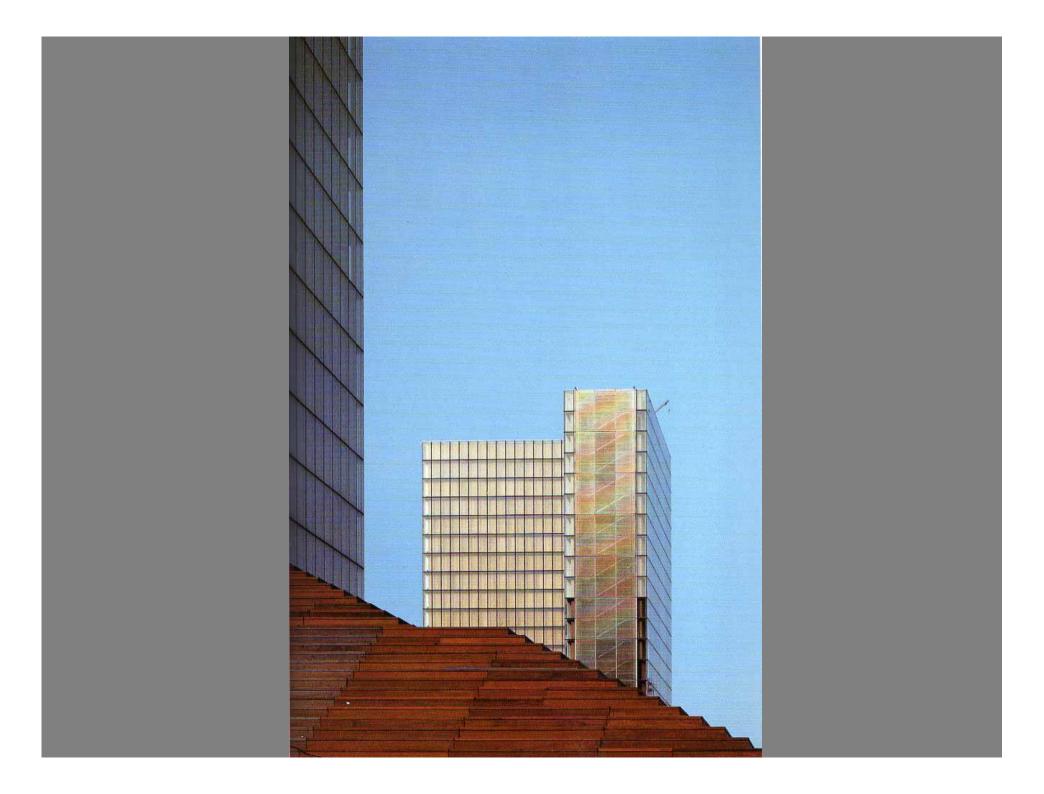

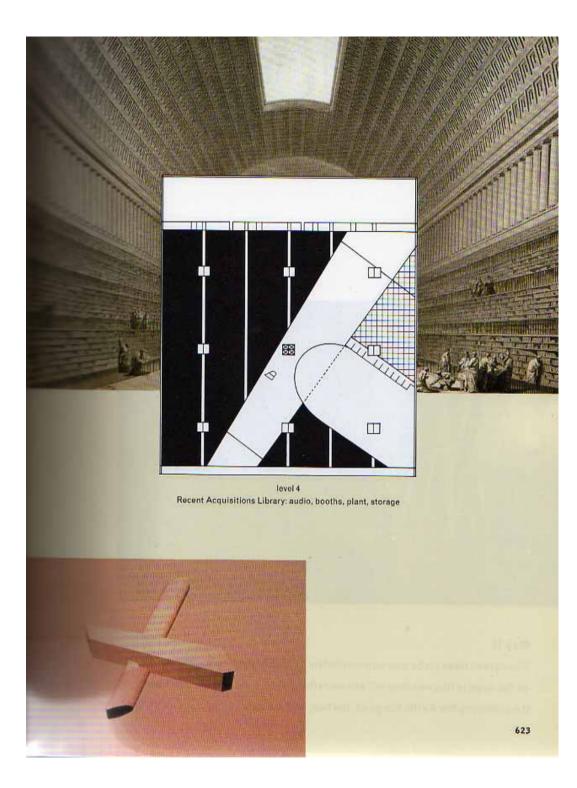

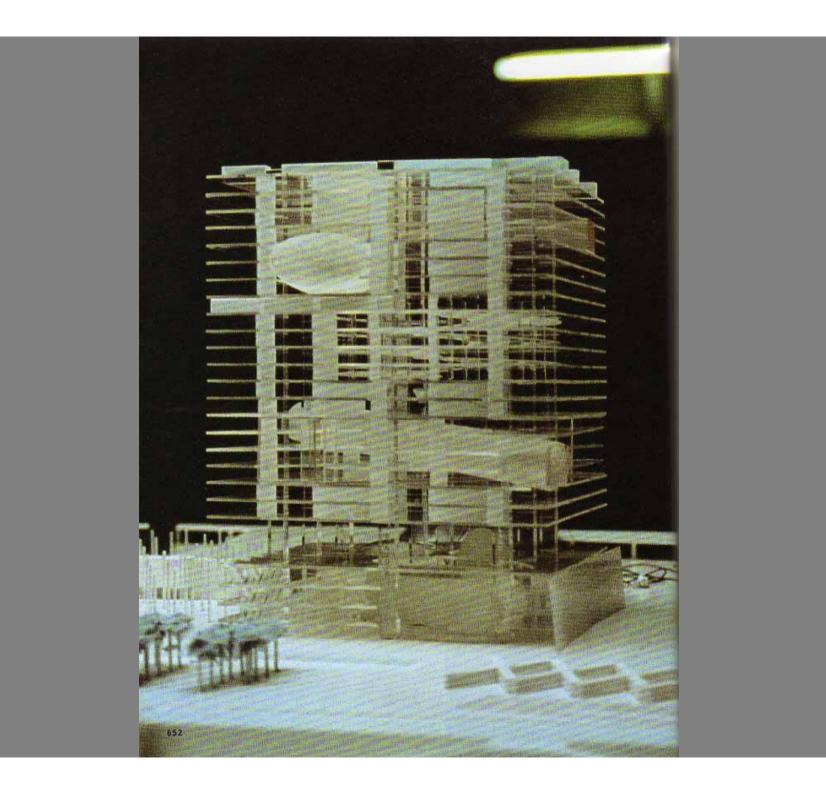

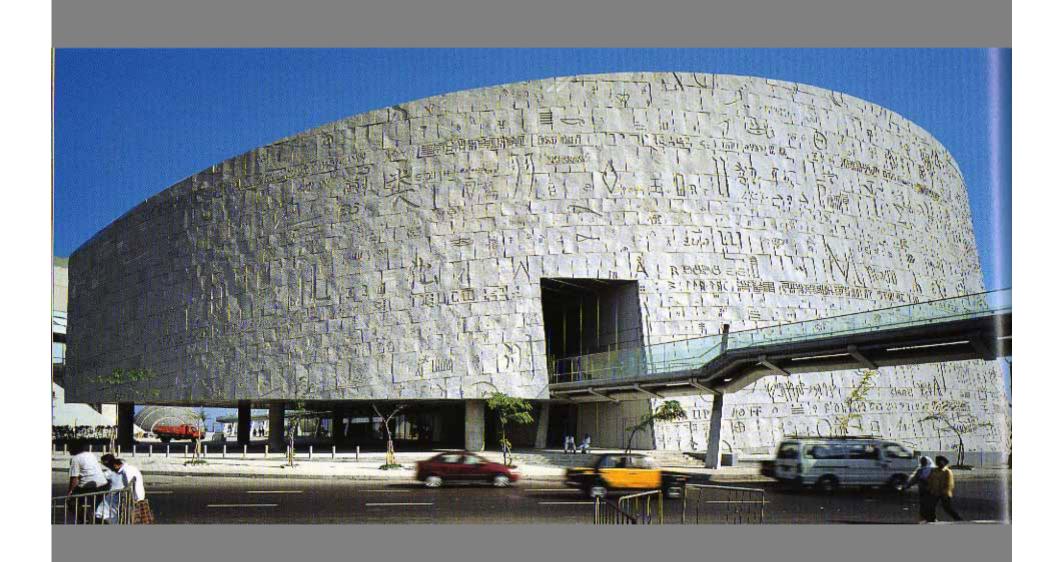

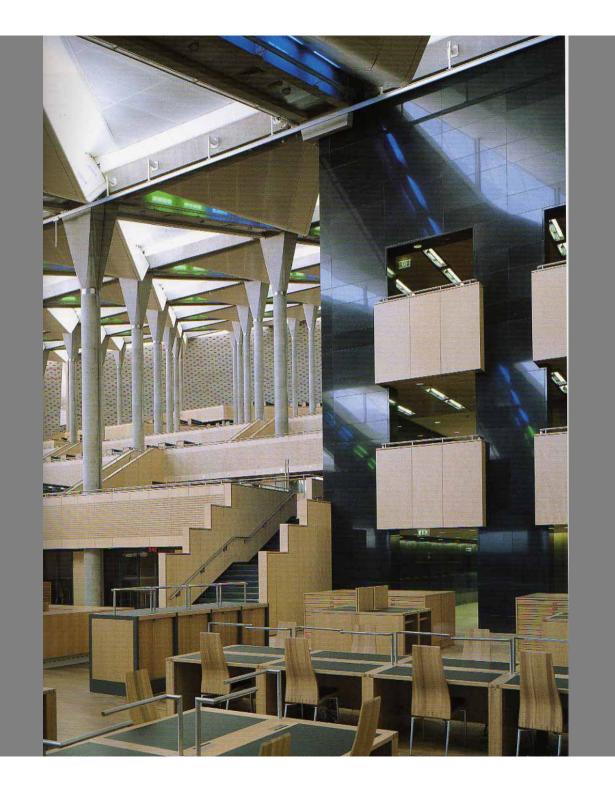

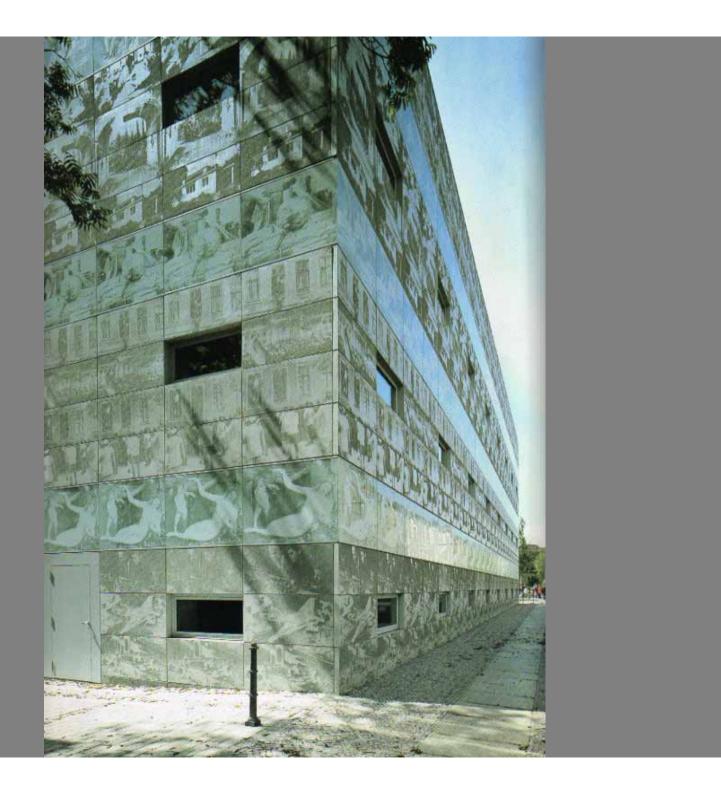

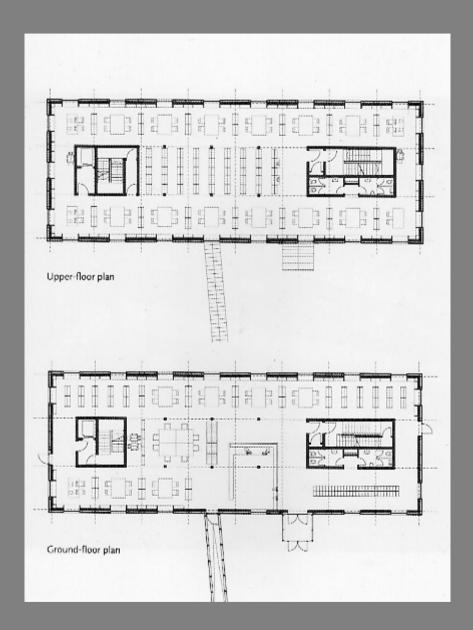

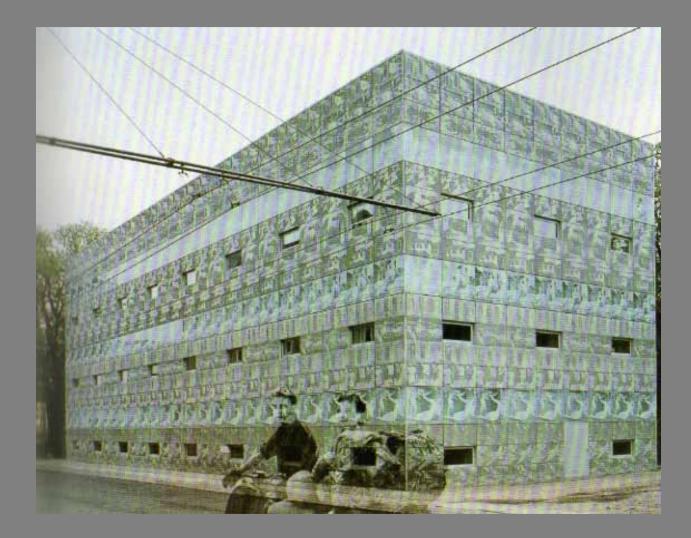

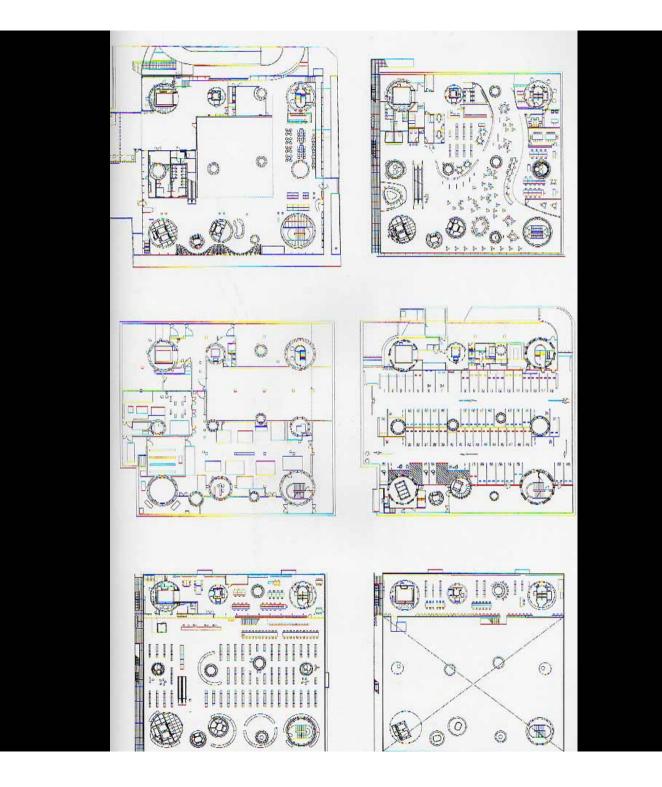

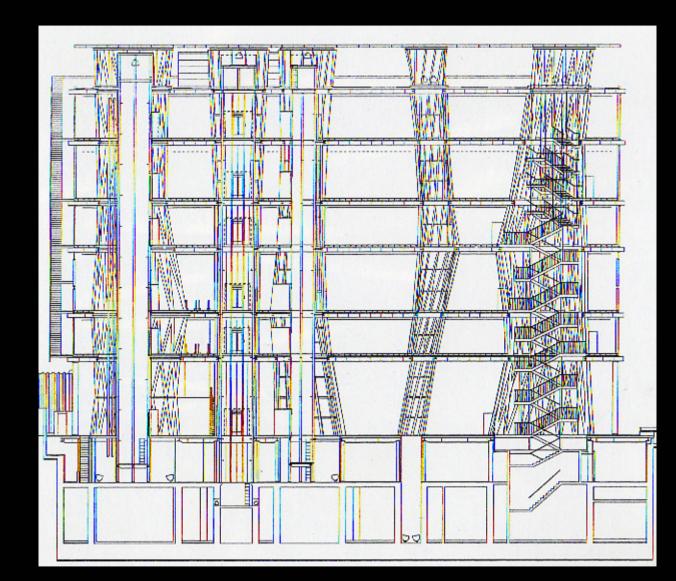

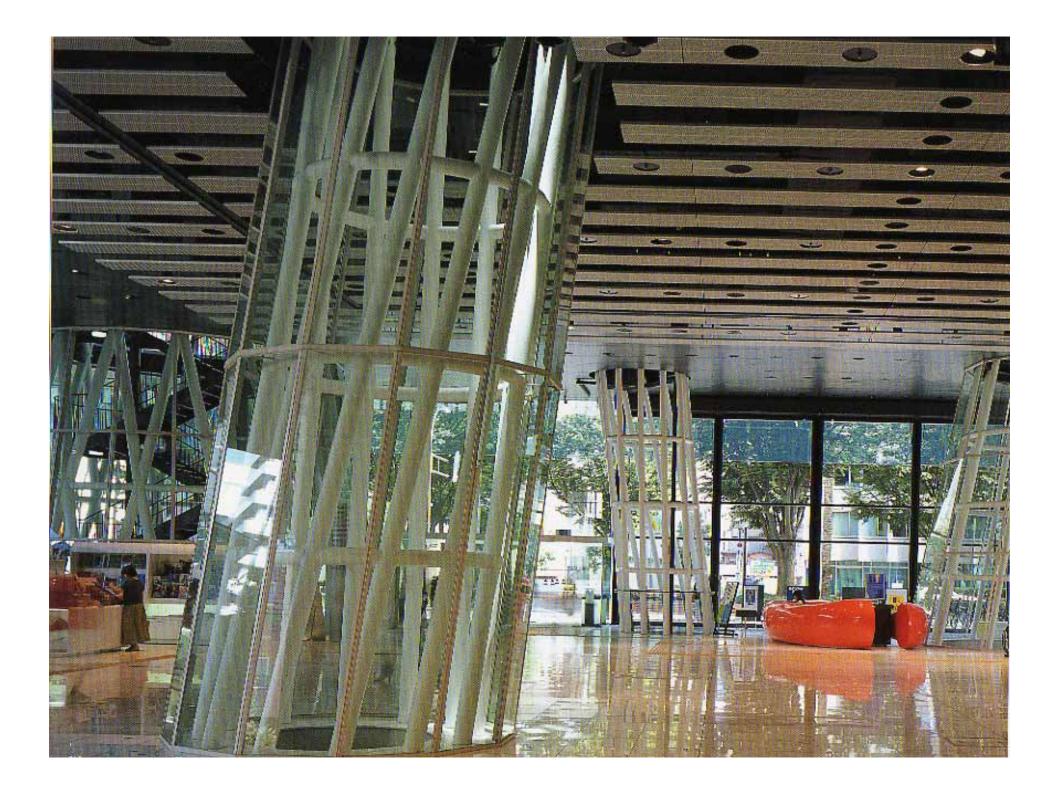

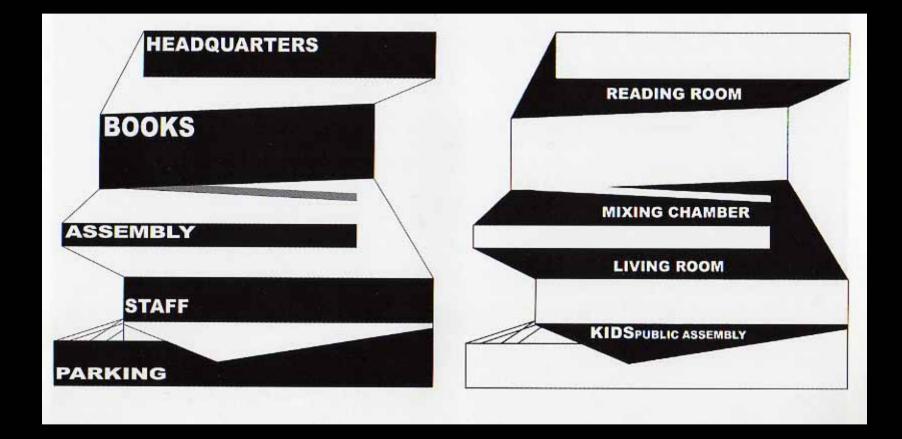

SEATTLE'S CENTRAL LIBRARY

Another provocative building is in the works for Sentile, a \$159 million library that offers recolutionary design inside and eat. The minime, by Rew Roethaus and his OMA architects in the Netherlands, in partnership with LDN of Sentile, is a building that using theore backs and propure for ambitious lechnology. The exterior is striking, even startling; sheets of glass and netal enclosing airy spaces isside and startiched like latticework between suspended Investment blocks. The design, according to OMA/LNN librature, "optimes the first footing have like a building have back and propure first militance of the strike and the strike of the strike and the strike of the strike and the strike of the strike of the strike of the strike of the strike and strike and the strike of the s

How the design evolved

At first gluence, it is many to more the large of this supporty concerns of a building. But the dualant started from a practical counderstore. What activities will this building be required to bundle and how could confir functions be grouped ingetter?

A true of case line clear property ingeneration of the weak of the second power in spaces that a serve other as mading means or book practs, for charapple, depending on charging means. The problem, as arithmetic saw it, as that storage apare was reveal out public sings, and has means are dependent with charging the fill.

The goal in Scattle is to create truly separate an un for each function. After tradycing functions and space requirements, free bread monotone sensemption administrations and said, collections, information, public space and parking. The architecturion distantiate goal is a first stacked losses and and that as a starting point for the totaling "a single.
