Project proposals (confidential)

2 More proposals have been submitted in September and October for the following calls:

- HORIZON-CL2-2021-HERITAGE-01-02: “LibrarIN”
- HORIZON-CL2-2021-HERITAGE-01-04: “GLAMS”

In January 2022 LIBER was also invited to take part in a consortium to work on a project proposal on HORIZON-WIDERA-2022-ERA-01-42. This project would support the development of aligned policies for open access books and monographs. The core of the call is to understand the landscape of policies and strategies for OA books among funders and institutions in Europe, analyse this data, and then come up with actionable recommendations.

PROJECTS DATABASE

The next steps regarding the projects database include:

- Optimization of procedure and survey for gathering future information, in order to update the Projects Database once per year.
- Identification of future project opportunities, partnerships and involvement of LIBER participants whenever possible.

The results of the database have been used in the requested period for the identification of potential proposal partners, as well as for co-organisers and collaborators in current project activities.

A second survey will be conducted in the summer of 2022. This will be organized by Andrej Vrcon and Roos Knigge.
