

Deliverables and Working plan

2024

LIBER WG Research Data Management

Activity 1: Update or create factsheets and guidelines

WG assessed factsheets and guidelines that the WG has published previously. We evaluated which factsheets and guidelines are still necessary and need to be updated. Additionally, we decided to create some new documents. The table shows the result of the assessment and planned deliverables.

Published Factsheet or guide	Type	Update/ new creation	Other comments	Priority
A practical guide to fair practices in research libraries 2022 Implementing FAIR Data principles: the role of libraries 2017	Guide Factsheet	Update	Combine these and update them together, add the CARE principles.	1
DMP basic knowledge for “regular” librarians’ factsheet (for those who are not deeply involved in data management)		New creation		2

Data Documentation Templates for different fields of research, like CESSDA	Templates for different fields	New creation		3
--	--------------------------------------	-----------------	--	---

Activity 2: DMP catalogue

We decided to continue work with the Data Catalogue. If updating the catalogue requires too many resources, we will take a new approach. New approach - instead of updating catalogue as it is, we collect DMP samples, good practices, links and factsheets. **Deliverable:** Collection of DMP samples, good practices, links and factsheets.

Activity 3: Workshops and Webinars

WG organises workshops and webinars.

Webinar/Workshop	Deliverable
February 2024 - webinar How do libraries use content of DMPs	Organised a webinar
Contributing to LIBER-OCLC webinar series	<ul style="list-style-type: none"> - Facilitated discussion 2: data-driven decision making, Wednesday 7 February 2024 - Facilitated discussion 3: AI and machine learning, Wednesday 17 April 2024 - Closing plenary session: 6 June 2024
July 2024 - LIBER conference workshop - "Exploring AI Hands-On: Shaping the Future of Research Library Services" in cooperation with other work groups	Organised workshop with other WG
November 2024 - Winter Event workshop Preliminary idea is to update The 6 Pillars	<ul style="list-style-type: none"> - Organised workshop during the Winter Event - Blogpost-or report about the workshop

Activity 4: Collaboration with other Working Groups

Active collaboration with other WGs on AI for research data management - submitted a workshop for LIBER Conference and after acceptance we could elaborate further what we could do more.

Deliverable: Workshops

Activity 5: Promotion of WG activities and deliverables

The working group has produced a lot of guidelines and other documents. These may not be as well known as they should. This time we pay special attention and look for new ways of communication and marketing. Need to find a way to promote more of what we have done.

Deliverable: Information in media like LIBER newsletter.
